About Us

Jiangyin Kebo Machinery Co., Ltd. is a professional manufacturer specializing in pressure vessel, chemical machinery, marine equipment and all kinds of metal structural parts. Established in 1986, the Company has obtained manufacture license for pressure vessels Class A1 and A2, ISO9001 Quality Management System certification and ASME certificate of authorization for manufacturing of pressure vessels with symbol U. The Company also holds a stake of Nanjing Xinke Chemical Engineering Co., Ltd. which has the design license for pressure vessels Class A1, A2 and A3. The Company has strong technical force, sophisticated production and inspection equipments, perfect quality control system and good after-sale service.

The main products are as different kinds of towers, reaction vessels, storage tanks, tube-type heat exchanger, VC series of vacuum dryer, gas dryer, inert gas system, MBR water treatment in Q235, Q245R, Q345R, 06Cr19Ni10, 304, 316L, 317L, 904L, 2205 and corresponding ASME material. All these materials are with approved WPQ and can be widely used in industries of petroleum, chemical engineering, chemical fiber, chemical fertilizer, fine chemicals, refrigerating, metallurgy, food, medicament, papermaking, city construction, marine application and so on.

Facing new opportunities and challenges, the Company creates good working atmosphere for the employees in a modern enterprise management method under the spirit of Unity and Progress, Realistic and Development, Pioneer and Innovation, and Win-win cooperation. Aiming at the perfect quality of products and satisfaction of customers, the Company perseveres in the quality policy of Integrity first, Quality first, Customer's satisfaction first and continuous improvement. We will focus on the application of new technology and equipments as usual, devoting ourselves to self-improvement and better quality to build up the Great Wall of pressure vessels and chemical equipments with our fraternities and customers.

Heat Exchanger

Heat exchanger for a nitrogenous fertilizer plant in Vietnam

Material: TP316L
Size of HEX: OD1450×6350
Size of tube: OD19×2
Surface: 425 SQM

Heat exchanger for a nitrogenous fertilizer plant in Vietnam

Material: TP304L
Size of HEX: OD1500×7136
Size of tube: OD14×2
Surface: 980 SQM

Heat exchanger for a petro-chemical plant in China

Material: S31603
Size of HEX: OD1000×8350
Size of tube: OD19×2
Surface: 486 SQM

Marine water treatment products

Shop size of tower

DN ≤ 4500mm

L ≤ 40000mm

Material

CS: Q245R, Q345R, 16MnDR, Q235-B

SS: 304, 316L, 321, 317L, 904L, 2205

254Smo, 253mA, Ailloy31

Marine water treatment products

Dryer

EGCS

MBR

IGS

STC

TOWER

①
Formaldehyde recovery tower for a chemical plant in China

Material: S30408
Size : OD2150×12×27870
Volume: 90 CBM

②
PPO & PCL silo for a plastic material plant in China

Material: S30403
Size : OD4300×10×23660
Volume: 300 CBM

③
Exhaust gas recovery unit of PTA project for a petro-chemical plant in China

Material: TP316H
Size : OD3000×28×13517
Volume: 92CBM

④
Agitator tank of PTA project for a petro-chemical plant in China

Material: S30403
Size : OD6200×20×13324
Volume: 290CBM
